26 February 2021

EDUCATIONAL TRAINING PROGRAM OF DISCIPLINE
"Stomatologia"

the main professional educational program of higher education - specialty program in the
specialty 31.05.01 General Medicine, approved in February 26, 2020

Form of education Full-time

The period of development 6

Department of Stomatologia №2

Vladikavkaz, 2021

When developing an educational training program, the discipline is based on:

1. Federal State Educational Standard of Higher Education on specialty 31.05.01 General Medicine, approved by the Ministry of Education and Science of the Russian Federation on February 9, 2016
2. Academic plan on specialty 31.05.01 General Medicine, ЛД-16-02-17 ИИ

approved by the Scientific Council of the Federal State Budgetary Educational Institution of Higher Education «North-Ossetia State Medical Academy» of the Ministry of Healthcare of the Russian Federation “26” February 2021, Protocol № 4.

The educational training program of the discipline was approved at a meeting of the department of Stomatology №2 from "29" January 2021, Protocol №. 1

The educational training program of the discipline was approved at a meeting of the central coordinating training and methodological council from "5" February 2021, Protocol №. 3

The educational training program of the discipline was approved by the Scientific Council of the State Medical University of the Federal State Budgetary Educational Institution of Higher Education «North-Ossetia State Medical Academy» of the Ministry of Healthcare of the Russian Federation from “26” February 2021, Protocol № 1.

Developers:

Head of the department

Assistant of the department

G. V. Toboev

R. K. Esiev

Reviewers:

M. G. Dzgoeva, head of the department of Stomatology №1 FSBEI HE NOSMA MOH Russia, doctor of medical sciences, professor.

R. V. Zoloev, head of the department of ortopedical stomatology FSBEI HE NOSU, doctor of medical sciences, professor.

Contents of the work program

1. The name of the discipline;
2. list of planned results of training in the discipline, correlated with the planned results of the development of the educational program;
3. indication of the place of the discipline in the structure of the educational program;
4. The amount of discipline in credit units, indicating the number of academic or astronomical hours allocated to the contact work of students with the teacher (by types of training sessions) and to the independent work of students;
5. content of the discipline, structured according to topics (sections) indicating the number of academic or astronomical hours assigned to them and types of training sessions;
6. list of educational and methodological support for independent work of students on discipline
7. A fund of evaluation tools for conducting intermediate certification of trainees in discipline;
8. List of basic and additional educational literature necessary for mastering the discipline;
9. list of resources of the information and telecommunication network "Internet" (hereinafter referred to as the "Internet" network), necessary for mastering the discipline;
10. methodical instructions for students to learn the discipline;
11. List of information technologies used in the implementation of the educational process for discipline, including a list of software and information reference systems (if necessary);
12. A description of the material and technical base necessary for the implementation of the educational process for discipline.
13. Conducting educational activities using e-learning and distance learning technologies.

2. List of planned learning outcomes for the discipline and the results of mastering the educational program

№ № п/ п	Room/ index complete the	Name of section disciplines	Results of development		
			Knows	Be able to	Be master of
1	3	2	4	5	6
1	GPC -6	The subject and objectives of dentistry. Diseases of the teeth, oral mucosa. The relationship between somatic and dental diseases. Anesthesia methods in dental practice.	-principles of organizing assistance to victims and wounded in the face in peacetime and wartime, as well as in local wars	to evaluate the data of radiation methods of examination	methods of maintaining medical records and reporting documents in medical organizations; principles of teaching patients oral hygiene
2	PC-6	Odontogenic inflammatory diseases. Clinic. Diagnostics. 2.http: \ \ www.edentworld.ru \ - Dental portal eDentWorld

3.http: \ \ www.dentoday.ru \ - Electronic version of the newspaper "Stomatology Today"

4.http: \ \ www.stomgazeta.ru \ - Archive of the publishing house "Poly Media Press"

10. Methodical instructions for students on mastering the discipline

Training consists of classroom lessons (48 hours), including a lecture course and practical exercises, and independent work (24 hours). The main study time is allocated for practical work on the diagnosis, course and treatment of various diseases and injuries of the maxillofacial region.

When studying the educational discipline "Dentistry", it is necessary to use knowledge in the field of dentistry and master the practical skills necessary in the activities of a doctor-hygienist.

Practical exercises are conducted in the form of an oral interview, demonstration of patients, student participation in dressings and the use of visual aids, solving situational problems, answering test tasks, and analyzing clinical patients.

In accordance with the requirements of the Federal State Educational Standard of Higher Education, active and interactive forms of conducting classes are widely used in the educational process.

The proportion of classes conducted in interactive forms is at least 15% of classroom lessons.

Independent work of students implies preparation for practical exercises and includes preparation for current and intermediate control, independent study of certain topics in the form of abstract works, writing a medical history of a supervised patient.

Work with educational literature is considered as a type of educational work in the discipline "Dentistry" - and is performed within the hours allotted for its study (in the CDS section).

Each student is provided with access to the library funds of the SOGMA and the department.

For each section of the discipline, "Guidelines for students in dentistry" and "Guidelines for teachers in dentistry" have been developed.

During the study of the academic discipline, students independently conduct an examination of patients, draw up a medical history and submit it to the teacher for evaluation.

Writing an essay, educational case history contributes to the formation of skills for independent study of the material and the skills of clinical diagnosis (skills).

The student's work in a group forms a sense of teamwork and sociability.

Teaching students helps them develop the skills of communicating with the patient, taking into account the ethical and deontological characteristics of pathology and patients. Independent work with patients contributes to the formation of professional behavior, accuracy, and discipline.

The initial level of students' knowledge is determined by testing, the current control of mastering the subject is determined by oral questioning during classes, during clinical analyzes, when solving typical situational tasks and answering test tasks.

At the end of the study of the discipline, intermediate control of knowledge is carried out using test control, testing of practical skills and solving situational problems - test.

11. The list of information technologies used in the implementation of the educational process in the discipline

№ semester	Type of lessons L, PW, S,	Used educational technologies (active, interactive)	Number of hours	% of sessions in an interactive form	List of Software
9	Lectures (L)	ЛТ, КОП	14	90	Multimedia setup: laptop, projector Microsoft Office Power Point; Acrobat Reader; Internet Explorer
9	Practical training (PT)	ПЗ, МГ, РИ, СИ	34	6	Information and legal system "Consultant", Information system «Госреестр ЛИС», Microsoft Office Power Point; Acrobat Reader;
9	Seminars (S)	ДЗ, С, ТЗ	24		Information and legal system "Consultant", Information system «Госреестр ЛИС», Microsoft Office Power Point; Acrobat Reader;

12. Description of the material and technical base required for the implementation educational process by discipline

№/п	Equipment name	Quantity	Technical condition
1	2	3	4
Special equipment			
1.	Multimedia complex (laptop, projector, screen)	1	good condition
2.	Dental unit	1	satisfactory condition
3.	Films	2	satisfactory condition
Dummies			
4.	Dummies of oncological diseases of the maxillofacial region.	5	satisfactory condition
5.	Skull	1	satisfactory condition
6.	Jaw Models for Practical Skills Training	5	satisfactory condition
Stands			
7.	Types of fractures of the lower jaw	1	satisfactory condition
8.	Specialized care for jaw fractures	1	satisfactory condition
9.	Timing of teething	1	satisfactory condition
10.	Photo albums on selected nosologies	10	satisfactory condition
11.	Photo questionnaires for processing, training and offset	2	satisfactory condition

13. Introduction of educational activities using e-learning and distance learning technologies. In the context of the introduction of restrictive measures (quarantine) associated with an unfavorable epidemiological situation, the threat of the spread of a new coronavirus infection and other force majeure events that do not allow full-time training, it is possible to study this discipline or part of it using e-learning and distance educational technologies.

Teaching the discipline in the above situations will be carried out through the development of an electronic course with access to video lectures and interactive materials, tests and various tasks. When conducting training sessions, monitoring progress, as well as intermediate certification of students, platforms of the electronic educational environment of the academy and / or other e-learning systems recommended for use in the academy, such as Moodle, Zoom, Webinar, etc., can be used.

Lectures can be presented in the form of audio, video, "live lectures", etc.

Conducting seminars and workshops is possible online in both synchronous and asynchronous modes.

Seminars can be held in the form of web conferences.
