PROGRAM PRACTICES

**PRACTICE ON OBTAINING PROFESSIONAL SKILLS AND
EXPERIENCE OF PROFESSIONAL ACTIVITY (ASSISTANT TO
DENTIST (ORTOPEDIST))**

the main professional educational program of higher education is the specialty program in the specialty 31.05.03 Dentistry, approved on 30.03.2022.

Specialty _____ 31.05.03 Dentistry (specialty) _____

Form of study _____ full-time _____

The term of development of OPOP in _____ 5 years _____
(standard training period)

Department _____ of Dentistry No. 1 _____

When developing the work program, the disciplines are based on:

1. Federal State Educational Standard for the specialty 31.05.03 Dentistry, approved by the Ministry of Education and Science of the Russian Federation on 12.08.2020, No. 984

2. The curriculum of the OPOP in the specialty 31.05.03 Dentistry

Stom-21-01-21

Stom-21-02-22

approved by the Academic Council of the Federal State Budgetary Educational Institution of the Ministry of Health on March 30, 2022, Protocol No. 6

The working program of the discipline was approved at the meeting of the Department of Dentistry No. 1 dated March 10, 2022, Protocol No. 2.

The working program of the discipline was approved at the meeting of the central coordinating educational and Methodological Council on March 22, 2022, Protocol No. 4

The working program of the discipline was approved by the Academic Council of the Federal State Budgetary Educational Institution of the Ministry of Health of the Russian Federation on March 30, 2022, Protocol No. 6

Head of the Department of Dentistry No. 1,

MD, Associate Professor

М.Г. Дзгоева

Associate Professor of the Department

of Dentistry No. 1, Candidate of Medical Sciences

С.К. Хетагуров

Reviewers:

Head of the Department of Orthopedic Dentistry, Propaedeutics and Postgraduate Education

K.L. Khetagurov, **MD., Professor R.V. Zolotoyev**

Head of the Department of Dentistry No. 2 of the Federal State Budgetary Educational Institution of the Ministry of Health of Russia, **MD, G.V. Toboev**

Content of the practice program

1. indication of the type of practice, method and form (forms) of its implementation;
2. a list of planned learning outcomes during internship, correlated with the planned results of mastering the educational program;
3. indication of the place of practice in the structure of the educational program;
4. an indication of the amount of practice in credit units and its duration in weeks or in academic or astronomical hours;
5. the content of the practice;
6. indication of reporting forms for practice;
7. a fund of assessment tools for conducting intermediate certification of students in practice;
8. a list of educational literature and Internet resources necessary for the practice;
9. a list of information technologies used in the practice, including a list of software and information reference systems (if necessary);
10. description of the material and technical base necessary for the practice.
11. conducting educational activities using e-learning and distance learning technologies.

1. Type of practice - production practice

Type of practice - practice for obtaining professional skills and experience of professional activity.

Method of carrying out - stationary, exit

Conduct form - discrete

2. List of planned learning outcomes during internship, correlated with the planned results of mastering the educational program

11. Conducting educational activities using e-learning and distance learning technologies

In the context of the introduction of restrictive measures (quarantine) associated with an unfavorable epidemiological situation, the threat of the spread of a new coronavirus infection and other force majeure events that do not allow training sessions in full-time mode, it is possible to study this discipline or part of it using e-learning and distance learning technologies.

Teaching discipline in the situations described above will be carried out through the development of an electronic course with access to video lectures and interactive course materials: presentations, articles, additional materials, tests and various tasks. When conducting training sessions, current monitoring of progress, as well as intermediate certification of students, the platforms of the electronic information and educational environment of the academy and / or other e-learning systems recommended for use in the academy, such as Moodle , Zoom , Webinar , etc., can be used.

Lectures can be presented in the form of audio, video files, "live lectures", etc.

Conducting seminars and practical classes is possible on-line in both synchronous and asynchronous modes. Seminars can be held in the form of web - conferences.
