March 30, 2022

PROGRAM PRACTICES

CLINICAL PRACTICE IN GENERAL PRACTICE DENTISTRY

the main professional educational program of higher education - programs of a specialist in specialty 31.05.03 Dentistry ,approved on March 30, 2022

Specialty 31.05.03 Dentistry (specialty)

Form of study full-time

The term for the development of the OPOP VO is 5 years

Department of Dentistry No. 1

When developing the work program of the discipline, the following are taken as the basis:

1. Federal State Educational Standard of Higher Education in the specialty 05/31/03 Dentistry, approved by the Ministry of Education and Science of the Russian Federation on August 12, 2020 No. 984

2. The curriculum of the OPOP VO in the specialty 31.05.03 Dentistry

(Stom-21-01-21)

(Stom-21-02-22)

approved by the Academic Council of the Federal State Budgetary Educational Institution of Higher Education SOGMA of the Ministry of Health of Russia on March 30, 2022, Protocol No. 6

The work program of the discipline was approved at a meeting of the Department of Dentistry No. 1 dated February 10, 2022, Protocol No. 2.

The work program of the discipline was approved at a meeting of the central coordinating educational and methodological council on March 22, 2022, protocol No. 4.

The work program of the discipline was approved by the Academic Council of the Federal State Budgetary Educational Institution of Higher Education SOGMA of the Ministry of Health of Russia dated March 30, 2022, Protocol No. 6

Developers:

Associate Professor, MD

M.G. Dzgoeva.

Associate Professor, Ph.D.

S.K. Khetagurov.

Reviewers:

Head Department of Orthopedic Dentistry, Propaedeutics and Postgraduate Education

Head Department of Dentistry No. 2, SOGMA of the Ministry of Health of Russia, MD, **G.V. Toboev**

Content of the practice program

1. indication of the type of practice, method and form (forms) of its implementation;
2. a list of planned learning outcomes during internship, correlated with the planned results of mastering the educational program;
3. indication of the place of practice in the structure of the educational program;
4. an indication of the amount of practice in credit units and its duration in weeks or in academic or astronomical hours;
5. the content of the practice;
6. indication of reporting forms for practice;
7. a fund of assessment tools for conducting intermediate certification of students in practice;
8. a list of educational literature and Internet resources necessary for the practice;
9. a list of information technologies used in the practice, including a list of software and information reference systems (if necessary);
10. description of the material and technical base necessary for the practice.
11. conducting educational activities using e-learning and distance learning technologies.

1. Type of practice - production practice

Type of practice - clinical practice.

Method of carrying out - stationary, exit

Conduct form - discrete

2. List of planned learning outcomes during internship, correlated with the planned results of mastering the educational program

No. p / k	Number / index of competence	Content of competence (or parts of it)	Topic of the lesson (section)	Achievement indicators competencies	Development results		
					know	be able to	own
one	2	3	4	five	6	7	eight
one	PC-6	Organizational and managerial activities	1. Mistakes and complications in the prosthetics of defects in the oral cavity.	ID-3 Fill out medical records and control the quality of medical records ID-4 Prepare the documentation required for the medical and social examination ID-5 Work in information and analytical systems (Unified State Health Information System) ID-6 Prepare a work plan and report on your work ID-7 Analyze the quality and effectiveness of medical records	1. Groups of errors in prosthetics of complete loss of teeth. 2. Mistakes and complications in fixed prosthetics	1. Determine the stage at which the error was made. 2. Make a plan to correct a clinical or laboratory error.	1. A technique for correcting errors at various stages of the treatment of complete loss of teeth.
2	OPK-5	Able to conduct a patient examination in order to establish a diagnosis in solving professional problems	1. Methodology for examining patients with defects and loss of teeth in the clinic of orthopedic dentistry. 2. Methods for determining the functional state of the dental system (clinical, functional	ID-1 GPC-5 Own the algorithm clinical examination of the patient. Diagnostic methods for complete loss of teeth in orthopedic dentistry 2. The method of collecting anamnesis with complete loss of teeth in the clinic of orthopedic dentistry	1. Carry out diagnostics in orthopedic dentistry 2. Collect anamnesis in the clinic of orthopedic dentistry 3. Conduct a clinical examination	1. Diagnostic technique for complete loss of teeth in orthopedic dentistry 2. The method of collecting anamnesis with complete loss of teeth in the clinic of orthopedic dentistry

			(laboratory) and static). 3. Features of the examination and laboratory methods for the study of patients with defects and loss of teeth	diagnostics in solving professional problems. ID-4 GPC-5 To be able to evaluate the results of clinical, laboratory and functional diagnostics in solving professional problems.	3. Clinical examination methods 4. Methods of treatment for partial loss of teeth 5. Methods of treatment for defects in the crown part of the teeth.		3. Methods of clinical examination with complete loss of teeth
3	PC-3	Development, implementation and control of the effectiveness of individual rehabilitation programs	1. Treatment for complete loss of teeth. Classification of structures used. 2. Treatment for partial loss of teeth with removable structures 3. Treatment of partial loss of teeth with fixed structures	ID-1 Develop a rehabilitation plan for patients with diseases of the maxillofacial region ID-2 Carry out rehabilitation measures for diseases of the maxillofacial region ID-3 Apply methods of complex rehabilitation of patients with dental diseases, taking into account the general condition of the body and the presence of concomitant pathology ID-4 Use personal protective equipment	1. Methods of treatment for complete loss of teeth 2. Methods of treatment for partial loss of teeth 3. Methods of treatment for defects of the crown	1. Make a treatment plan for complete and partial loss of teeth. 2. Justify the optimal choice of orthopedic construction	1. Method of treatment for complete loss of teeth 2. Methods of treatment for partial loss of teeth 3. A method of treatment for defects in the crown part of the teeth.
4	PC-3	Development, implementation and control of the effectiveness of individual rehabilitation programs	1. Methods for determining the functional state of the dental system (clinical, functional (laboratory) and static).	ID-1 Develop a rehabilitation plan for patients with diseases of the maxillofacial region ID-2 Carry out rehabilitation measures for diseases of the maxillofacial region ID-3 Apply methods of complex rehabilitation of patients with dental diseases, taking into account the general condition of the body and the presence of concomitant pathology ID-4 Use personal protective equipment	1. Fundamentals and principles of evidence-based medicine 2. Fundamentals of working with medical search engines	1. Analyze the information obtained while working with medical search engines	1. Public speaking skills in a professional environment

3. Indication of the place of practice in the structure of the educational program

The practice belongs to the mandatory part of Block 2 of the Practice of the Federal State Educational Standard of Higher Education in the specialty 31.05.03 Dentistry.

Types of professional activity underlying the teaching of this discipline:

Medical

Organizational - managerial

Research.

4. Indication of the amount of practice in credit units and its duration in weeks or in academic or astronomical hours

No. No. p / p	Type of work	Total credits	Total hours	Semester
				eight
				hours
one	2	3	4	five
one	Contact work of students with the teacher (total), including:		48	48
2	Student Independent Work (SIW)		24	24
3	Type of intermediate certification	credit (G)		
		exam (E)		
4	TOTAL: Total labor intensity	hours	72	72
		Z	2	

5. Content of practice

No./n	No. semester	Name of the topic (section) of practice	Contact. watch	Myself. Slave.	Total hours
one	eight	Preparatory stage, briefing.	2	2	4
2	eight	Dental examination of the patient.	4	2	6
3	eight	Methods of local conductive anesthesia in dentistry	6	2	eight
4	eight	Prevention of common complications of anesthesia and dental interventions	6	2	eight
five	eight	Treatment for complete loss of teeth	6	4	10
6	eight	Treatment for partial loss of teeth	eight	4	12
7	eight	Treatment for defects in the crown part of the teeth	eight	4	12
eight	eight	Periodontal diseases, diagnosis, treatment.	6	2	eight
nine	eight	TMJ diseases. Diagnosis and treatment	2	2	4
TOTAL:			48	24	72

6. Indication of reporting forms in practice

Based on the results of the practice, students draw up a diary of practice in the prescribed form, and the head of the practice - a report according to the form.

7. Fund of assessment tools for conducting intermediate certification of students in practice

No./n	List of competencies	No. semester	Indicator(s) evaluation	Evaluation criterion(s)	Evaluation scale	Name FOS

eight	Federal Electronic Medical Library (FEMB)	https://feml.scsml.rssi.ru/

10. Description of the material and technical base necessary for the practice

The Department of Dentistry No. 1 is located on the basis of the SOGMA Dental Clinic (Kirov St., 66). The total area used by the department for the educational process is 61 sq. m².

The department has three rooms:

- an orthopedic room equipped with a dental unit, combined with the office of the head of the department (9 sq m²), which also holds classes for students,
- one phantom class for 5 phantoms and 8 computers (32 sq. m²),
- an orthopedic room for 3 dental units (20 sq.m²), which also holds practical classes for students.

No./ P	Name of equipment	Quantity	Technical condition
one	2	3	4
Special equipment			
one	a laptop	one	Good
2	projector	one	satisfactory

3	camera	one	Good
4	PC	6	Good
five	Dental units	3	satisfactory
phantoms			
one	Dental phantoms	five	satisfactory
dummies			
one	Preparation jaws	twenty	satisfactory

11. Conducting educational activities using e-learning and distance learning technologies

In the context of the introduction of restrictive measures (quarantine) associated with an unfavorable epidemiological situation, the threat of the spread of a new coronavirus infection and other force majeure events that do not allow training sessions in full-time mode, it is possible to study this discipline or part of it using e-learning and distance learning technologies.

Teaching discipline in the situations described above will be carried out through the development of an electronic course with access to video lectures and interactive course materials: presentations, articles, additional materials, tests and various tasks. When conducting training sessions, current monitoring of progress, as well as intermediate certification of students, the platforms of the electronic information and educational environment of the academy and / or other e-learning systems recommended for use in the academy, such as Moodle , Zoom , Webinar , etc., can be used.

Lectures can be presented in the form of audio, video files, "live lectures", etc.

Conducting seminars and practical classes is possible on-line in both synchronous and asynchronous modes. Seminars can be held in the form of web - conferences.
