EDUCATIONAL TRAINING PROGRAM OF DISCIPLINE

«SURGICAL DISEASES»

the main professional educational program of higher education - specialty program in the specialty 31.05.03 Dentistry, approved in 24.05.2023.

Form of education _____ full-time _____

The period of development _____ 6 _____

Department of _____ Surgery diseases №2

Vladikavkaz, 2023 г.

When developing an educational training program, the discipline is based on:

1. Federal State Educational Standard of Higher Education in the specialty 31.05.03 Dentistry, approved by the Ministry of Education and Science of the Russian Federation August 12, 2020 No. 984.
2. The academic plan of OPOP VO in the specialty 31.05.03 Dentistry:
 СТОМАТ-21-01-21 ИИ
 СТОМАТ-21-02-22ИИ,
 СТОМАТ-21-03-23ИИ, was approved by the Scientific Council of the State Medical University of the Federal State Budgetary Educational Institution of Higher Education «North-Ossetia State Medical Academy» of the Ministry of Healthcare of the, Russian Federation from «24» May, 2023, № 8.

The educational training program of the discipline was approved at a meeting of the department of Surgery Diseases № 2 from «19» May, 2023, № 10.

The educational training program of the discipline was approved at a meeting of the central coordinating training and methodological council from «23» May 2023, № 5.

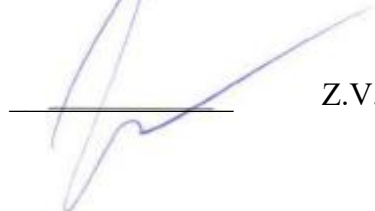

The educational training program of the discipline was approved by the Scientific Council of the State Medical University of the Federal State Budgetary Educational Institution of Higher Education «North-Ossetia State Medical Academy» of the Ministry of Healthcare of the, Russian Federation from «24» May, 2023, № 8.

Developers:

Associate Professor,
 Department of Surgical Diseases № 2

 M.V.Kalitsova

Associate Professor,
 Department of Surgical Diseases № 2

 Z.V.Totikov

Reviewers:

Tomaev M.V., Chief Surgeon of the CHEC of the RNO-A, 10.05.2023.

Beslekov U.S., MD, Associate Professor, Head of the Department of Surgical Diseases No. 1 of the Federal State Budgetary Educational Institution of Higher Education NOSMA of the Ministry of Health of Russia, 10.05.2023.

Content of the educational program

1. name of the discipline;
2. list of the planned learning outcomes in the discipline, correlated with the planned results of the study program;
3. the place of discipline in the structure of the educational program;
4. the amount of discipline in credit units, indicating the number of academic or astronomical hours allocated for contact work of students with a teacher (by type of training) and for independent work of students;
5. the content of the discipline, structured by topics (sections) with an indication of the number of academic or astronomical hours allocated for them and types of training;
6. a list of educational and methodological support for independent work of students in the discipline;
7. fund of assessment tools for intermediate certification of students in the discipline;
8. a list of basic and additional educational literature necessary for mastering the discipline;
9. a list of resources of the information and telecommunication network "Internet" (hereinafter - the "Internet" network), necessary for mastering the discipline;
10. methodological instructions for students on the development of the discipline;
11. a list of information technologies used in the implementation of the educational process in the discipline, including a list of software and information reference systems (if necessary);
12. description of the material and technical base necessary for the implementation of the educational process in the discipline.
13. conducting educational activities using e-learning and distance learning technologies..

2. List of the planned learning outcomes in the discipline, correlated with the planned results of the study program

№№ п/п	Number/I ndex of competen cy	Content of competency (or part of it)	Theme	Competence achievement indicators	Development results		
					To know	To be able to	To have skills of
1	2	3	4	5	6	7	8
1.	GPC-5	Able to conduct a patient examination in order to establish a diagnosis in solving professional problems.	Acute appendicitis. Complications. Acute cholecystitis. Complications. Acute pancreatitis. Complications. Complications of peptic ulcer. Gastrointestinal bleeding. Abdominal hernia. Complications. Acute intestinal obstruction. Acute peritonitis.	ID-1 GPC-5 Own the algorithm of clinical examination of the patient. ID-2 GPC-5 To be able to draw up a plan for laboratory and instrumental diagnostics. ID-3 GPC-5 Own the algorithm of clinical, laboratory and functional diagnostics in solving professional problems. ID-4 GPC-5 To be able to evaluate the results of clinical, laboratory and functional diagnostics in solving professional problems.	Definition, classification, etiology, pathogenesis, clinical picture, diagnosis, treatment of patients with surgical pathology.	Conduct a survey and examination of patients with surgical diseases, interpret the data of laboratory and special research methods, analyze the information received and make a diagnosis, prescribe treatment and evaluate its results.	Methods for the diagnosis and treatment of surgical diseases.
2.	GPC-6	Able to prescribe, monitor the effectiveness and safety of non-drug and drug treatment in solving professional problems.	Acute appendicitis. Complications. Acute cholecystitis. Complications. Acute pancreatitis. Complications. Complications of peptic ulcer. Gastrointestinal bleeding. Abdominal hernia. Complications. Acute intestinal obstruction.	ID-1 GPC-6 Be able to conduct effective, safe therapy based on the clinical recommendations of the Russian Ministry of Health.	Definition, classification, etiology, pathogenesis, clinical picture, diagnosis, treatment of patients with surgical pathology.	Conduct a survey and examination of patients with surgical diseases, interpret the data of laboratory and special research methods,	Methods for the diagnosis and treatment of surgical diseases.

			Acute peritonitis.			analyze the information received and make a diagnosis, prescribe treatment and evaluate its results.

9. The list of resources of the information and telecommunication network "Internet" necessary for mastering the discipline

«Консультант студента» <http://www.studmedlib.ru>.

10. Methodical instructions for students on mastering the discipline

Education consists of classroom lessons (68 hours), including a lecture course and practical exercises, and independent work (40 hours). The main study time is allocated for practical work in surgical diseases.

When studying the discipline, it is necessary to use the entire arsenal of theoretical knowledge and master practical skills in surgical diseases.

Practical exercises are conducted in the form of a theoretical survey and testing, demonstrations of visual aids (slides, tables, multimedia presentations), solving situational problems, answering test tasks, as well as demonstrations of patients, laboratory and instrumental research methods, with clinical analysis, self-supervision of patients surgical profile.

In accordance with the requirements of the Federal State Educational Standard of Higher Education, active and interactive forms of conducting classes are widely used in the educational process (indicate educational technologies). The proportion of classes conducted in interactive forms is at least 20% of classroom lessons.

Independent work of students implies preparation for classes, for testing, writing a medical history, preparation for current and intermediate control and includes the study of all topics of the discipline.

Work on literature is considered as a type of educational work in the discipline "Surgical diseases" and is performed within the hours allotted for its study (in the CDS section).

Each student is provided with access to the library funds of the SOGMA and the department.

For each section of the discipline, guidelines have been developed for students and teachers.

During the study of the academic discipline, students independently examine patients, draw up medical documentation and present the patient for clinical discussion

Writing an essay and educational medical history contribute to the formation of practical skills and abilities.

The student's work in a group forms a sense of teamwork and sociability.

Teaching students helps them develop the skills of communicating with patients, taking into account the ethical and deontological characteristics of pathology and patients. Independent work with patients contributes to the formation of medical behavior, accuracy, discipline.

The initial level of knowledge is determined by oral questioning during classes, during clinical analyzes, when solving typical situational tasks and answering test tasks.

At the end of the discipline, intermediate control is carried out using test control, testing of practical skills and solving situational problems.

Questions on the academic discipline (module) are included in the IGA graduates

11. The list of information technologies used in the implementation of the educational process in the discipline

- Microsoft word
- Microsoft excel

- Microsoft Power Point
- Adobe photoshop
- Adobe Acrobat
- Adobe Finereader

12. Description of the material and technical base necessary for the implementation of the educational process in the discipline

The material and technical base of the department is represented by:

The total area of the educational and laboratory base is 350 - m2, including 200 m2 - educational, 150 m2 - educational and auxiliary.

This fund includes 12 training rooms

Including specialized laboratories (educational 12 and scientific 0)

Equipment of training rooms (laboratories)

classrooms in the amount of 9 (satisfactory condition), 3 (in need of repair)

№/п	Name of equipment	Amount	Technical condition
Special equipment			
1.	Microscope, pcs.	-	-
2.	Negatoscope, pcs.	-	-
3.	ECG, pcs.	-	-
4.	Other equipment (list)	-	-
Phantoms			
1.	Phantom reanimation	1	satisfactory
2.	Phantom head with esophagus	1	satisfactory
3.	Forearm phantom	1	satisfactory
4.	Phantom of the pelvis	1	satisfactory
Dummies			
1.	Tables, pcs.	100	satisfactory

13. Conducting educational activities using e-learning and distance learning technologies

In the context of the introduction of restrictive measures (quarantine) associated with an unfavorable epidemiological situation, the threat of the spread of a new coronavirus infection and other force majeure events that do not allow full-time training, it is possible to study this discipline or part of it using e-learning and distance educational technologies.

Teaching the discipline in the above situations will be carried out through the development of an electronic course with access to video lectures and interactive course materials: presentations, articles, additional materials, tests and various tasks. When conducting training sessions, monitoring progress, as well as intermediate certification of students, platforms of the electronic information and educational environment of the academy and / or other e-learning systems recommended for use in the academy, such as Moodle, Zoom, Webinar, etc., can be used.

Lectures can be presented in the form of audio, video files, "live lectures", etc.

Conducting seminars and practical classes is possible on-line both in synchronous and asynchronous modes. Seminars can be held in the form of web-conferences.
