10. Methodical instructions for students on the development of the discipline

Training consists of classroom activities (240 hours), including practical training and independent work (48 hours). The main training time is allocated for practical work on types of speech activity in order to prepare foreign students for clinical practice in Russian.

In the study of the discipline it is necessary to use visual materials and technical means of training, to master the practical skills of communicative productive and reproductive speech.

Practical classes are held in the form of individual and group forms of training; the following organizational forms are distinguished: classroom practical classes (lesson in language practice), extracurricular practical training, consultation, credit, exam, interview, home training. The ultimate goal of training is the formation and development of speech skills in different types of speech activity.

Tables, cards, video, audio equipment (audio-visual means of training), visual and auditory video, computer class with Internet access are used.

In accordance with the requirements of the educational process active and interactive forms of conducting classes are widely used with the use of intense forms of training objectives: role play, situational exercises, reproductive exercises, discontinue exercises, etc. Teaching students to work independently when using intensive technology contributes to the optimization of the RFL teaching process.

The share of classes conducted in interactive forms is not less than 35 % of classroom lessons.

Independent work of students involves language training and includes mastering the strategy of independent work in the study of Russian as a foreign language.

Work with educational literature is considered as a kind of educational works on the subject "Russian as a foreign language" and is performed within the hours allotted for its study (in the section of the humanitarian cycle of independent students' work).

Each student is provided with access to the library collections of the Academy and the Department.

During the study of the discipline, students independently prepare for classes, to control and verification works, tests and exams, submit reports, abstracts.

The student's work in the group creates a sense of collectivism and sociability.

Current control of mastering of the subject is determined by an oral examination in the classroom, in solving typical situational tasks and the answers to the test tasks and the test after the development of the theme, test your knowledge of the linguistic material and the ability to use it in oral speech.

At the end of the study of the discipline is the final control of knowledge using test material, control material for different types of speech activities of social and professional orientation, situational problems of different levels of complexity corresponding to the levels of competence of students.

11. The list of information technologies used in the implementation of the educational process in the discipline.

Semester	Type of classes	Educational technologies used (active, interactive)	number of hours	% of lessons in the interactive form	List of software
1	Practical class	practical task, test, business play, role play, mental card	46	6	Microsoft Office
	Seminars	situational play, test			PowerPoint; Internet Exploer

2	Practical class Seminars	practical task, test, business play, role play, mental card situational play, test, Educational and Research Work of students	42	5.5	Microsoft Office PowerPoint; Internet Exploer
3	Practical class Seminars	practical task, test, business play, role play, mental card situational play, test, Educational and Research Work of students	38	5	Microsoft Office PowerPoint; Internet Exploer
4	Practical class Seminars	practical task, test, business play, role play, mental card situational play, test, Educational and Research Work of students	34	4.5	Microsoft Office PowerPoint; Internet Exploer
5	Practical class Seminars	practical task, test, business play, role play, mental card situational play, test, Educational and Research Work of students	38	5	Microsoft Office PowerPoint; Internet Exploer
6	Practical class Seminars	practical task, test, business play, role play, mental card situational play, test, Educational and Research Work of students	34	4.5	Microsoft Office PowerPoint; Internet Exploer

7	Practical class Seminars	practical task, test, business play, role play, mental card situational play, test, Educational and Research Work of students	20	2,5	Microsoft Office PowerPoint; Internet Exploer
8	Practical class Seminars	practical task, test, business play, role play, mental card situational play, test, Educational and Research Work of students	15	2	Microsoft Office PowerPoint; Internet Exploer

12. Description of the material and technical base necessary for the implementation of the educational process in the discipline

The material and technical base of the Department is represented by:

“North-Ossetian State Medical Academy”, the educational building № 2.

Total area of the training base of (SOGMA) North-Ossetian State Medical Academy is 117,3M2 , including 4 classrooms по17.2 m2, 1 training room, 15.8 m2 assistant room – 32,71 m2 .

Equipment of training rooms:

- study room for students 5 (in need of repair)
- 5 boards (status: satisfactory)
- desks 29 (partially in need of replacement)
- 32 chairs (partially need to be replaced)

№/ p	Name of equipment	Quantity	Technical condition
1	2	3	4
Special equipment			
1.	Computer	3	needs to be replaced – 2
2.	Notebook	1	good
3.	TV set	1	needs to be replaced

4.	Music center	1	good
5.	Video player	5	good
6.	Copying equipment	2	good – 1; needs to be replaced – 1
Tables			
7.	Thematic tables	35	need to be replaced
