31 August 2020

**EDUCATIONAL TRAINING PROGRAM OF DISCIPLINE
«FACULTY SURGERY, UROLOGY»**

the main professional educational program of higher education - specialty program in the
specialty 31.05.01 General Medicine, approved in August 31, 2020

Form of education Full-time

The period of development 6

Department of Surgery Diseases №2

Vladikavkaz, 2020

When developing an educational training program, the discipline is based on:

1. Federal State Educational Standard of Higher Education on specialty 31.05.01 General Medicine, approved by the Ministry of Education and Science of the Russian Federation on February 9, 2016 №95
2. Academic plan on specialty 31.05.01 General Medicine,
 ЛД-16-01-16 ИИ
 ЛД-16-02-17 ИИ
 ЛД-16-03-18 ИИ
 ЛД-16-04-19 ИИ
 ЛД-16-05-20 ИИ

approved by the Scientific Council of the Federal State Budgetary Educational Institution of Higher Education «North-Ossetia State Medical Academy» of the Ministry of Healthcare of the Russian Federation “31” august 2020, Protocol № 1.

The educational training program of the discipline was approved at a meeting of the department of Surgical Diseases from "26" august 2020, Protocol №. 1

The educational training program of the discipline was approved at a meeting of the central coordinating training and methodological council from "28" august 2020, Protocol №. 3

The educational training program of the discipline was approved by the Scientific Council of the State Medical University of the Federal State Budgetary Educational Institution of Higher Education «North-Ossetia State Medical Academy» of the Ministry of Healthcare of the Russian Federation from “31” august 2020, Protocol № 1.

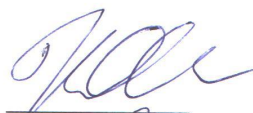

Developers:

Associate Professor,

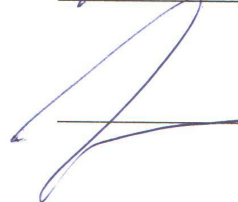

Department of Surgical Diseases № 2

Associate Professor,

Department of Surgical Diseases № 2

M.V.Kalitsova

Z.V.Totikov

Reviewers:

Groshilin V.S., MD, professor, head of the Department of Surgical Diseases No. 2, FSBEI HE RSMU of the Ministry of Health of Russia, 26.08.2020 г.

Beslekov US, MD, Associate Professor, Head of the Department of Surgical Diseases No. 1, FSBEI HE SOGMA of the Ministry of Health of Russia, 26.08.2020 г.

Working program content

1. Name of the discipline;
2. The list of planned learning outcomes in the discipline, correlated with the planned learning outcomes of the educational program;
3. The indication of the place of discipline in the structure of the educational program;
4. The amount of discipline in credit units indicating the number of academic or astronomical hours allocated to the contact work of students with the teacher (by type of training) and the independent work of students;
5. The content of the discipline, structured by topics (sections) indicating the number of academic or astronomical hours allocated to them and the types of training sessions;
6. List of educational and methodological documents for independent work of students in the discipline;
7. Fund assessment tools for conducting intermediate certification of students in the discipline;
8. The list of basic and additional educational literature necessary for mastering the discipline;
9. The list of resources of the information and telecommunication network "Internet" (after that "Internet" network) necessary for mastering the discipline;
10. Guidelines for students in the development of the discipline;
11. The list of information technologies used in the implementation of the educational process in the discipline, including a list of software and information reference systems (if necessary);
12. The description of the material and technical base necessary for the implementation of the educational process in the discipline.
13. Conducting educational activities using e-learning and distance learning technologies.

2. The list of planned learning outcomes in the discipline, correlated with the planned learning outcomes of the educational program

№ п/п	Number/competency index	Competency Content (or parts of it)	Theme of the lesson (section)	Results of mastering		
				To know	To be able to	To manage
1	2	3	4	5	6	7
1.	PC-5	Readiness to collect and analyze patient complaints, medical history, examination results, laboratory, instrumental, pathological and anatomical and other investigations to recognize the condition and establish the fact or absence of a disease.	Acute appendicitis. Complications Cholelithiasis. Acute cholecystitis. Acute pancreatitis. Hernia of the abdomen. Complications of hernias. Acute intestinal obstruction. Pyloric stenosis. 3. The place of discipline in the structure of the educational program

The discipline "Faculty surgery" refers to the base part of block 1 of the Federal State Educational Standard of Higher Education, specialty 31.05.01 General medicine.

4. The amount of the discipline

№	Type of work	Total credits	Total hours	Terms	
				№7	№8
				hours	hours
1	2	3	4	5	6
1	Contact work of students with teacher (total), including:		146	110	36
2	Lectures (L)		44	30	14
3	Clinical practice (CP)		102	80	22
4	Seminars (S)				
5	Laboratory works (LW)				
6	Student's independent work (SIW)		70	52	18
7	Type of intermediate Certifications	Credit(C)	-	Credit	
		Exam (E)		36	36
8	TOTAL: General labor intensity	Hours	252		
		Credit units	7	4,5	2,5

5. Discipline content

№	№ of term	The name of the topic (section) of the discipline	Types of educational activities (in hours)					Forms of current performance monitoring
			L	LW	CP	SIW	total	
1	2	3	4	5	6	7	8	9
1	7	Module 1. Acute appendicitis. Complications of acute appendicitis. Acute cholecystitis. Acute pancreatitis. Abdominal hernia. Module 2. Pyloric stenosis, penetration, malignancy. Perforated ulcer. ZhKK. Peritonitis. Diseases of the colon. Diseases of the rectum	20	-	52	36	108	
2	8	Module No. 1. Breast diseases. Diseases of the lungs and pleura. Diseases of the veins.	14	-	22	18	54	
3	7	General urology	10		28	16	54	
TOTAL:			44		102	70	216	

6. The list of educational and methodological support for independent work of students in the discipline

№	№ of term	Name of educational-methodical document
1	2	3
1.	7	Acute appendicitis.
2.	7	Complications of acute appendicitis.
3.	7	Acute cholecystitis.
4.	7	Acute pancreatitis.
5.	7	Obstructive jaundice.
6.	7	Abscess and gangrene of the lung.
7.	8	Diseases of the rectum.
8.	8	Breast disease.
9.	8	Strangulated abdominal hernia.
10.	8	Purulent pleurisy.
11.	7-8	Methodical recommendations for independent extracurricular work.
12.	8	Methodological guidance for practical training.
13.	8	Methodical recommendations for independent extracurricular work of 4th year students of medical and pediatric faculties.

The fund of assessment tools for intermediate certification of students in discipline

№ / п	Competency list	№ Of term	Indicator (s) assessment	Evaluation criteria (s)	Grading system	Name of FES

9. The list of resources of the information and telecommunication network "Internet" necessary for mastering the discipline

«Student's Consultant»

www.studmedlib.ru

10. Guidelines for students in the development of the discipline

Studying consists of classroom lessons (146 hours), including a lecture course and practical classes, and independent work. The main academic time is devoted to practical work on surgical diseases and urology.

During the study, it is necessary to use the whole arsenal of theoretical knowledge and to master practical skills in surgical diseases and urology.

Practical classes are conducted in the form of a theoretical survey and testing, demonstrations of visual aids (slides, tables, multimedia presentations), solution of situational tasks, answers to test tasks, as well as demonstrations of patients, laboratory and instrumental methods of research, with clinical analysis, self-supervision of patients surgical and urological profile.

In accordance with the requirements of the Federal State Educational Standard, the active and interactive forms of conducting classes are widely used in the educational process (indicate educational technologies). The proportion of classes conducted in interactive forms is at least 20% of classroom classes.

Independent work of students involves preparing for classes, for testing, writing a medical history, preparing for current and intermediate control and includes the study of all topics of the discipline.

Work on literature is considered as a type of educational work in the discipline of faculty surgery, urology”and is carried out within the hours allotted for its study (in the section CPC).

Each student is provided with access to the library funds of the SOGMA and the department.

For each section of the discipline developed guidelines for students and teachers.

During the study of the discipline, students independently examine patients, draw up medical documentation and present the patient for clinical discussion

Writing an educational case history contributes to the formation of practical skills.

Student work in a group creates a sense of teamwork and sociability.

Teaching students helps them develop communication skills with patients, taking into account the ethical and deontological characteristics of pathology and patients. Independent work with patients contributes to the formation of medical behavior, accuracy, discipline.

The initial level of knowledge is determined by oral questioning during classes, during clinical reviews, when solving typical situational problems and answers to test tasks.

At the end of the study of the discipline, an examination is carried out..

11. The list of information technologies used in the implementation of the educational process in the discipline

- Microsoft Office
- Power Point
- Acrobat Reader
- Internet Explorer

12. Description of the material and technical base necessary for the implementation of the educational process in the discipline

The total area of the training base is 90 m² (PCH)

Class rooms -3.

Professor's room -1

Equipment of class rooms

№	Name of equipment	Ammounr	Technical condition
Специальное оборудование			
1.	Computer	2	satisfactory
2.	Printer	2	satisfactory
3.	Laptop	1	satisfactory
4.	Multimedia projector	1	satisfactory
5	Tables	50	satisfactory

13. Conducting educational activities using e-learning and distance learning technologies

In the context of the introduction of restrictive measures (quarantine) associated with an unfavorable epidemiological situation, the threat of the spread of a new coronavirus infection and other force majeure events that do not allow full-time training, it is possible to study this discipline or part of it using e-learning and distance educational technologies.

Teaching the discipline in the above situations will be carried out through the development of an electronic course with access to video lectures and interactive course materials: presentations, articles, additional materials, tests and various assignments. When conducting training sessions, monitoring progress, as well as intermediate certification of students, platforms of the electronic information and educational environment of the academy and / or other e-learning systems recommended for use in the academy, such as Moodle, Zoom, Webinar, etc.

Lectures can be presented in the form of audio, video, "live lectures", etc.

Conducting seminars and practical classes is possible in on-line mode both in synchronous and asynchronous modes. Seminars can be conducted in the form of web conferences.
