

When developing the educational training programme, the discipline is based on :

1. Federal State budget educational standards of Higher Education on speciality 31.05.01 General Medicine , approved by the Ministry of Education and Science of the Russian Federation. August «12», 2020 N 988

2. The curriculum for speciality 31.05.01 General Medicine,

ЛД- 21-01-21 ИИ

ЛД- 21-02-22 ИИ

ЛД- 21-03-23 ИИ

Approved by the Academic Council of the Federal State Budgetary Educational Institution of Higher Education "North-Ossetia State Medical Academy" of the Ministry of Healthcare of the Russian Federation, May «24», 2023, protocol N 8

The educational training program of the discipline was approved at the meeting of the central coordinating training and methodological council from "23" May 2023, Protocol № 5

The educational training program of the discipline was approved at the meeting of the department of foreign languages from "21" May 2023, Protocol 9.

Developers:

Head of the Department
Khatsaeva D.T

Teacher Tsallagova Z.T.

Reviewers:

1. Zaseeva G.M.- Associate Professor, Head of the Department of German Language Candidate of Philology, Associate Professor of FSBEI HE of "North Ossetia State University"

2. Alikova Z.R Head of the department of Humanities, social and economic Sciences FSBEI HE NOSMA of Healthcare ministry of Russian Federation, professor, Doctor of medical science.

Content of the Program

1. The name of the discipline
2. The list of the planned educational results on the discipline
3. The indication of the place of the discipline in the structure of the educational program
4. Volume of the discipline in test units with indication of the quantity of academic or astronomic hours, given to the contact work of students with a teacher and for the individual work
5. The content of the discipline, ring according to the themes with indication of amount of academic or astronomic hours and types of the classes
6. The list of educational methodical insurance for the self-individual work of students on the discipline
7. The fund of evaluating means for intermediate evaluation of the students on the discipline
8. The list of basic and additional literature
9. The list of the resources of information telecommunicating net “Internet”, necessary for the mastering the discipline
10. Methodical Indications for the students for mastering of the discipline
11. The list of the information technologies used in educational process including the list of provider program and informative reference system (if necessary)

12. The description of the material and technical base, necessary for educational process on the discipline

2. The list of the planned results of education on the discipline and results of development of educational programs

	Number / index of the competence	The content of the competence (or its part)	The content of the discipline	Quality indicators	Results of the development		
					know	be able	master

10. Methodical recommendations for students

The teaching consists of classroom lessons (108 hours), representing practical classes (72 hours), and independent work (36 hours). The basic teaching time is for the practical work for the mastering of medical terminology.

While studying the discipline the knowledge of Russian, Foreign languages Chemistry, Biology, Anatomy and Histology are used.

Practical classes are carried in the form of the discussion of terminological material, its mastering in the educational situations, solving the case studies, performance of tests and final tests.

Independent work of students implies preparation home tasks and includes:

- learning vocabulary,
- reading, translation and analysis of anatomical, clinical and pharmaceutical terms,
- doing outclass independent work.

Work with educational literature is considered as a kind of educational work on the discipline “The Latin language” and is done in the limit of time given to its study.

Every student has access to the academic library.

“Methodical recommendations in Latin for the students of the 1 year of medical faculty” is done to the each section of the discipline, «Methodical materials for independent work in Latin for the students of the 1 year of medical faculty» and methodical recommendations for teachers «Methodical materials for teachers in Latin ».

Students' group work forms sense of teamwork and sociability.

Training of students promotes communicative skills with considering psychological, social and national peculiarities of a person.

Independent work promotes formation of skills of constant work on self education.

The initial level of students' knowledge is determined by test; the current control of mastering the subject is determined by the oral interview at the lesson. At the end of the study of the discipline the intermediate control is carried with the use of test control, checking of practical skills in the form of exam.

13. E Learning and distance Educational Technologies in Educational Activities

Online distance learning emerged as a solution to continue with teaching and learning during the COVID-19 pandemic. The COVID-19 has resulted in schools and high learning Institutions shut all across the world. As a result, education has changed dramatically, with the distinctive rise of e-learning, whereby teaching is undertaken remotely and on digital platforms.

The teaching of the discipline under the circumstances can be conducted through virtual tutoring tools, or online learning software . In response to significant demand, many online learning platforms are offering free access to their services, including platforms like Moodle, Zoom, Webinar and others.
