Federal State Budgetary Educational Institution of Higher Education
«North-Ossetia State Medical Academy»
of the Ministry of Healthcare of the Russian Federation

**EDUCATIONAL TRAINING PROGRAM OF DISCIPLINE
«Medicine of Disasters»**

the main professional educational program of higher education - specialty program in the
specialty 31.05.01 General Medicine, approved in May 24, 2023

Form of education Full-time

The period of development 6

Department of Traumatology and orthopedics

Vladikavkaz, 2023

When developing an educational training program, the discipline is based on:

1. Federal State Educational Standard of Higher Education on specialty 31.05.01 General Medicine, approved by the Ministry of Education and Science of the Russian Federation on February 9, 2016 №95

2. The curriculum of the MPEP FIE in the specialty 31.05.01 Medical care
ЛД-16-04-18 ИИ,
ЛД-16-05-19 ИИ,
ЛД-16-06-20 ИИ, approved by the Academic Council of the Federal State Budgetary Educational Institution of the Ministry of Higher Education NOSMA of the Ministry of Health of the Russian Federation on May 24, 2023, Protocol №. 8

The working program of the discipline was approved at the meeting of the Department of Traumatology and Orthopedics on «22» May 2023, Protocol No 10.

The working program of the discipline was approved at the meeting of the central coordinating educational and Methodological Council on «23» May 2023, Protocol No 5.

The working program of the discipline was approved by the Academic Council Federal State Budgetary Educational Institution of the Ministry of Health of the Russian Federation on «24» May 2023, Protocol No8

Developers:

Associate Professor of the Department of traumatology
and orthopedics, candidate of medical Sciences

D. V. Dzatseeva

Reviewers:

Director of the State Budgetary Health Institution
Territorial center for Disaster Medicine
of the Ministry of health of the Russian Federation
for North Osetia-Alania

Butaev A.P.

Professor, Doctor of Medical Sciences,
the head of department of surgical diseases №2

Totikov V.Z.

Content of the work program

1. name of discipline;
2. the list of planned results of training in the discipline, correlated with the planned results of the development of the educational program;
3. indication of the place of discipline in the structure of the educational program;
4. the volume of discipline in credits indicating the number of academic or astronomical hours allocated for contact work of students with a teacher (by type of training sessions) and for independent work of students;
5. the content of the discipline, structured by topics (sections) with an indication of the allotted number of academic or astronomical hours and types of training sessions;
6. the list of educational and methodological support for independent work of students in the discipline;
7. evaluation tools for interim certification of students in the discipline;
8. the list of basic and additional educational literature necessary for the development of the discipline;
9. the list of resources of the information and telecommunication "Internet" (hereinafter-the "Internet") necessary for the development of the discipline;
10. methodical instructions for students on the development of the discipline;
11. the list of information technologies used in the implementation of the educational process in the discipline, including a list of software and information reference systems (if necessary);
12. description of the material and technical base necessary for the implementation of the educational process in the discipline.
13. Conduct educational activities with the use of e-learning and distance educational technologies

2. The list of planned results of training in the discipline and the results of the development of the educational program

3. Place of discipline in the structure of the educational program

Discipline "Life Safety" refers to the basic part Of the unit 1 of the Federal STATE Educational Standard of Higher Education 31.05.01. «General medicine.» Types of professional activity, which are the basis of teaching this discipline:

1. medical;
2. organizational and managerial
3. research and development

4. The amount of discipline

№ № п/п	Kind of work	Total credits	Total hours	Semester	
				12	
				hours	
1	2	3	4	5	
1	Contact work of students with teacher (total), including:	-	50	50	
2	Lectures (L)	-	10	10	
3	Practical training (Pt)	-	40	40	
4	Seminars (S)				
5	Laboratory work (LW)				
6	Independent work of the student (IWS)	-	22	22	
7	Type of intermediate certifications	+	+	+	+
8	Total: laboriousness	72	72	72	
		2	2	2	

5. Content of the discipline

№/п	№ semester	Name of the topic (section) of the discipline	Types of training activities (in hours)				Forms of current performance monitoring
			L	PT	IWS	Total	
1	2	3	4	5	6	7	8
1	12	Tasks, organizational structure and management bodies of the All-Russian Disaster Medicine Service.	1	2	1	4	I, T, St
2	12	Fundamentals of medical evacuation provision of the population in emergency situations of peacetime and wartime.	-	2	1	3	I, T, St

3	12	Features of medical and sanitary provision in the aftermath of natural and man-made emergencies.	1	2	1	4	I, T, St
4	12	Sanitary and anti-epidemic (preventive) measures for the elimination of the consequences of emergency situations.	1	2	1	4	I, T, St
5	12	Preparation and organization of work of medical and preventive institutions in emergency situations.	1	2	1	4	I, T, St
6	12	Fundamentals of the organization of medical supplies, medical and psychological support of the population, medical workers and rescuers in emergency situations.	1	2	1	4	I, T, St

9. World health organisation <http://www.who.int/ru/>

10. Methodical instructions for students on the development of the discipline

Training consists (72 hours) of classroom training(50 hours), including a lecture course 10 hours and practical classes 40 hours, and independent work (22h.). The main training time is allocated for practical work on the assimilation of theoretical knowledge, the acquisition of practical skills and abilities.

In the study of the discipline it is necessary to use the entire resource of the main and additional educational literature, lecture material, visual AIDS and demonstration materials and to master the practical skills and abilities acquired in the course of working with demonstration visual AIDS, phantoms and solving situational problems.

Practical classes are held in the form of seminars, classroom work with personal protective equipment, phantoms, demonstrations, use of visual AIDS, diagrams, solving situational problems, answers to test tasks.

According to the Federal STATE Educational Standard of Higher Education in the educational process are widely used active and interactive forms of training (developing and problem training in the form of modular training, discussions with brainstorming and without it). The share of classes held in interactive forms is not less than 20% of classroom classes.

Independent work of students implies preparation for practical classes, entrance, current, intermediate final controls and includes individual and homework with visual materials, educational basic and additional literature, Internet resources, solving situational problems, writing abstracts, preparing presentations, etc.

Work with educational literature is considered as a type of educational work on the discipline of life safety, disaster medicine and is performed within the hours allotted for its study (IWS).

Each student is provided with access to the library collections of the Academy and the Department.

For each section of the discipline developed guidelines for students in all sections of the discipline in the electronic database of the Department.

During the study of the discipline, students independently carry out transport immobilization, solve situational problems, draw up a workbook and submit the results of the work performed for the signature of the teacher.

Writing an essay contributes to the formation of General cultural, General professional and professional skills.

Students work in a group creates a sense of teamwork and interpersonal skills.

11. The list of information technologies used in the implementation of the educational process in the discipline

Semester	Occupation L, PT, IWS	Educational technologies used (active, interactive)	amount of hours	% classes in interactive form	List of software
3	L	Set of slides, videos, educational films for a	18	20	Microsoft Office, PowerPoint;

		traditional lecture			Internet Explorer
3	PT	A set of questions and tasks for a practical task, a set of situational tasks for CS, a set of case histories for the analysis of clinical cases.	36	20	Microsoft Office, PowerPoint; Internet Explorer
3	IWS	Questions and tasks for independent work, subject of presentations	18	-	Microsoft Office, PowerPoint; Internet Explorer

12. Description of the material and technical base necessary for the implementation of the educational process in the discipline

In the implementation of the educational program for the study of the discipline "life Safety" are used:

- study rooms for students,
- multimedia complex (laptop, projector, screen);
- personal computer, computer class;
- slide sets, tables/multimedia visual AIDS
- materials on various sections of the discipline;
- situational challenges;
- wood boards.
- lectures are provided with a projector, laptop, screen for demonstrations of multimedia presentations developed in the program Power Point.

no./	equipment Name	Quantity	Technical condition
1	2	3	4
Special equipment			
	Computer	3	satisfy.
	Laptop	2	satisfy.
	The projector	2	satisfy.
	Copying equipment	2	satisfy.
Dummies			
	Anatomical model of the hip	1	satisfy.

	Anatomical model of the wrist / hand	1	satisfy.
	Anatomical model of the knee	1	satisfy.
	Anatomical model elbow	1	satisfy.
	Anatomical model shoulder	1	satisfy.
	Anatomical model of the foot/ankle	1	satisfy.
	Functional anatomical model of the knee joint	1	satisfy.
Trainer			
	Complex-simulator KTNP-01 - "ELTEK"	1	satisfy.

13. Conduct educational activities with the use of e-learning and distance educational technologies

In conditions of introduction of restrictive measures (quarantine) associated with an unfavorable epidemiological situation, the threat of the spread of a new coronavirus infection, and other force majeure events that do not allow conducting training sessions in person, it is possible to study this discipline or part of it using e-learning and distance education technologies.

Teaching the discipline in the above situations will be carried out through the development of an electronic course with access to video lectures and interactive course materials: presentations, articles, additional materials, tests and various tasks. When conducting training sessions, current monitoring of academic performance, as well as intermediate certification of students, the Academy's electronic information and educational environment platforms and/or other e-learning systems recommended for use in the Academy can be used, such as Moodle, Zoom, Webinar etc.

Lectures can be presented in the form of audio, video files, "live lectures", etc. Seminars and practical classes can be held on-line in both synchronous and asynchronous modes. Seminars can be held in the form of web conferences.
